****SPECIAL NOTICE****

The Young Entomologists' Society, its advisors, staff, volunteers and/or sponsors, have no control over the use of the information contained in this directory and/or conduct of members who enter into specimen exchanges. Every attempt was made to provide accurate information at the time of publication, but if any error, correction, deletion, addition or abuses are noted they should be reported to the Young Entomologists' Society, Dept. of Entomology, Michigan State University, East Lansing, MI 48824-1115 USA.

The Y.E.S. Member Directory is published at Michigan State University, East Lansing, Michigan by the Young Entomologists' Society. Y.E.S. receives some of its support from the U.S. Department of Agriculture, the MSU Department of Entomology and the Entomological Society of Canada. The opinions of authors expressed in this publication are their own and may not represent the views of Y.E.S. member staff. Membership in Y.E.S. is open to any person with an interest in entomology, regardless of age, sex, race, national origin or handicap. Financial assistance is available to obtain membership. Send all inquiries on membership, manuscript submission or back issues to: Young Entomologist's Society, c/o Department of Entomology, Michigan State University, East Lansing, MI 48824-1115 USA.

The Young Entomologists' Society

The Young Entomologists' Society (Y.E.S.) is an international organization that caters to the special needs of youth and amateur entomologists, but is also useful to the professional entomologist. Y.E.S. is partially supported by the United States Department of Agriculture, Michigan State University, Entomological Society of Canada, and Y.E.S. members. You may have been familiar with the predecessor of this organization, the Teen International Entomology Group (TIEG) which was founded in 1965.

Y.E.S. has several important goals. We assist all entomologists in establishing contact with colleagues in other geographical regions who share similar entomological interest, so that they might learn from one another by sharing information, advice, literature, and specimens. We offer the opportunity for youth and amateur entomologists to become involved in the operation of a society, and to publish their articles and artwork in a journal free of page charges. We also sponsor activities such as art, photography and writing competitions for youth members.

Professional entomologists are encouraged to become involved in Y.E.S., as members or otherwise, because they serve as role models and teachers to guide the personal and educational development of the other members.

Membership in Y.E.S. is open to any interested person regardless of age, sex, race, creed, national origin, or handicap. There are four categories of membership: (1) youth - U.S. \$3.00/yr., (2) collegiate - \$5.00/yr., (3) adult - \$10.00/yr., and (4) sustaining - \$25.00/yr. minimum.

Materials for publication in the groups journal, Y.E.S. QUARTERLY, are accepted from members and non-members alike. Instructions for authors are printed on the inside front cover of the journal. Articles and trading post ads (members only) are published on a first come, first serve basis.

Purpose of the Member Directory

The purpose of this member directory is to facilitate contact between members for exchange of information, advice, literature, and specimens. As such, it is merely a supplement to the trading post ads published in Y.E.S. QUARTERLY. Only members with a specific desire to correspond and trade specimens are listed in the directory; thus, you should find most listees willing to interact.

How to Use the Directory

This member directory is designed to be as compact and simple to use as possible. There are actually two important parts to the directory: cross-referenced lists of members by their entomological interests, and a master list of member names and addresses. In the master list the members are listed alphabetically along with classification and member number. (Note: A typical code number looks something like this: 111-MI-3. The first three digits are the member number, the second item is an abbreviation of the members home state or country, and the third item is the membership status. Thus, this coded number would be interpreted as follows: member number 111 lives in Michigan (USA) and is an adult member. A complete list of all the locality abbreviations and memberships categories is given in Table 1.)

Section Advisor's Role

Some Y.E.S. members have volunteered to act as section leaders or advisors, to assist you with your needs for advice, information or expertise. They are listed at the head of each section in the directory. Please send your inquiries directly to them, as they will do their best to help you.

If you would like to become a section advisor, please send your name, address, and brief description of entomological interests and expertise to: Young Entomologists' Society, Department of Entomology, Michigan State University, East Lansing, MI 48824-1115 U.S.A.

Tips for Exchanging Specimens

Over the years a set of "unwritten rules" concerning insect specimen exchanging (trading) have developed. Although based largely on courtesy and common sense, I think it is appropriate to discuss these "rules" for the benefit of our younger members who might be contemplating their first trade.

In general, insect trading operates very well based on a small number of important courtesies. When you get involved in an exchange of specimens you will be expected to be honest and trustworthy (don't make offers you can't deliver on), prompt, and supply A-1, perfect specimens with complete label data (and usually a determination). There could be some exceptions on this latter item as you will see later.

When you write to a fellow Y.E.S. member or other entomologist to propose an exchange, I suggest the following simple format: (1) introduce yourself and tell a little about your interests or studies, (2) list the species, etc., you are interested in obtaining, (3) list the species, etc., you have to offer in exchange (include the number of each you have available for exchange) and (4) outline the conditions of exchange. When you outline your conditions you can give the details of any special conditions you may have regarding specimen mounting (pinned vs unpinned, for example), specimen sexes, exchange ratio (one for one, two for one, etc.,) level of determination, and the like. This is also a good time to mention any variations from normal procedure, like the need to supply a slightly damaged specimen due to rarity of occurrence, for instance. In all cases it is very helpful to type or write legibly. (It's a very good idea to print species names, and labels, to avoid errors. Also, not everyone reads or writes your native language, or is familiar with abbreviations you may use.)

In general, you will not need a permit to exchange or purchase dead insect specimens (and many live specimens as well) and ship them through the U.S. mail. The regulations may vary in other countries. In the United States, all LIVE plant pests, exotic or domestic, will require a permit; pure colonies of predators and receiver of shipment has responsibility for compliance with state and federal regulations. For applications or information contact the nearest USDA-PPQ, Animal and Plant Health Inspection Service office or your state Department of Agriculture.

Assuming you have successfully arranged an exchange, you're now ready to assemble and mail your specimens. Careful packing is essential to assure the safe and undamaged arrival of your specimens. It's your responsibility to see that the specimens get to their destination in one piece! Also, be prompt in responding with your part of the exchange.

Prepared specimens should be layered in cotton or tissue paper and packed in a mailing box. Wood is best (especially for overseas mail), but plastic and sturdy cardboard work well also. Pinned specimens should be "double-boxed". Place the specimens in an inner box with a foam (or cork) pinning bottom. Cut a piece of cardboard to fit inside of the box and on top of the pin heads. Fill the space above this cardboard slip with tissue paper. This will prevent the pins from becoming dislodged in shipment. Place this inner box into a larger box, to be padded with at least 1-2 inches of foam chips, excelsior or crumpled paper.

If you wrap your package with kraft paper, place an extra mailing label under the paper in case it is mutilated in shipment. Make sure all addresses (receiver and sender) are legible and complete (and if you use anything other than a permanent ink, cover the addresses with transparent tape to prevent smudging or other damage). Label your package **PROMINENTLY** with the following statement:

You can purchase special adhesive labels from a entomological supply firm, or have a rubber stamp made up like the one used to the left. If you are mailing your package outside of your own country you will have to affix a "Parcel Post Customs Declaration" on which you must list the contents and value of your package. Since insects

are generally considered to have no commercial value and you should state so on your customs declaration. This way no duty will have to be paid in the U.S. you can go to any Post Office and ask for Postal Form 2966-A or 2966-B.

In an exchange, each party pays postage as the sender. If you mail the package to a domestic address, you should generally send it by first class parcel post (in some instances you may be able to send it by library rate). Some U.S. collectors have also used private parcel delivery services with good results. If you are mailing your package overseas, you should always send it by airmail to avoid delay, loss or damage.

If you follow these few simple guidelines, I am sure you will have many worthwhile exchanges and enrich your collection.

**** MEMBER NAMES, ADDRESSES, AND INTEREST STATEMENT ****

Dee Ann & Eddie Abernathy

Route 1, Box 32
Altus, OK 73521

David Albaugh

9 Columbia Avenue
Jamestown, Rhode Island 02835

Saturniidae, Ornithoptera, rearing, breeding, conservation, illustrating
collecting (day and night)

Terrance M. Allen

One Shoal Court, Apt. #137
Sacramento, California 95831

David Allred

111 East 700 South
St. George, Utah 84770

Dawn Alsept

216 Stockbridge Rd.
Gregory, MI 48137

I want to study onion flies. I live in Stockbridge area--very large onion
producing area. I enjoy all areas of entomology.

Gary L. Alves

303 N. First
Dayton, WA 99328

Heather L. Anderson

2001 East 16th
Sedalia, MO 65301

Interested in trading insects from the central U.S. with insects,
especially Lepidoptera from the tropic regions and other countries.

Mandie Armstrong

P.O. Box 658
Ballinger, TX 76821

Cotton entomology in Texas is primary involvement. Also dedicated to
working with children & youth in entomology.

Sandrine Arnaud

3955 Reston Court
South San Francisco, CA 94080

**** MEMBER NAMES, ADDRESSES, AND INTEREST STATEMENT ****

Ross H. Amett, Jr.
4300 NW 23rd Avenue
Suite 100
Gainesville, FL 32606

American insects; beetles of the world; natural history writing.

David Babad
3 Hamilton Court
Lawrenceville, NJ 08648

John J. Bade, Jr.
54 Bancroft Ave.
Staten Island, NY 10306

Michael Bain
7 Crestwood Drive
New Port Beach, CA 92660

Wish to learn about different moth species and about different methods of collecting (i.e., baits, traps, buying, trading).

William C. Bakewell
10824 Lindbrook Apt. 309
Los Angeles, CA 90024

Leaf-litter and soil arthropods, entomological writing, sweepnetting and other techniques of collecting arthropods from vegetation.

Elvira Barchet
6740 Clybourn Avenue #242
North Hollywood, CA 91606

Cerambycidae: whole family. Carabidae: carabus

Roger Barrett
6 rue des Chenevieres
45130 Meung-sur-Loire
FRANCE

Donald L. Baumgartner
150 S. Walnut
Palatine, IL 60067

Research on taxonomy, distribution, ecology of nearctic

**** MEMBER NAMES, ADDRESSES, AND INTEREST STATEMENT ****

Mary Bedford

National 4-H Council
7100 Connecticut Ave.
Chevy Chase, MD 20815

Pierre Belanger

806 Bellevue
Ste. Foy, Quebec G1V 2R3
CANADA

Nearctic and European Cerambycidae, Scarabaeidae, Elateridae, Carabidae, Buprestidae, Curculionidae, and tenebrionidae & some other small families of Coleoptera. Also photo. & biology/ecology of species of this order.

Bryan Belay

Route #1, Box 291
Pearisburg, VA 24134

I have reared Lepidoptera, collect cocoons & pin and label in a professional manner.

Robert J. Bergman

24853 Ward
Taylor, MI 48180

Study life cycles, collecting, globally, scientific research techniques, environmental affects on growth. Interested in exchanges, correspondence, determinations/ identification and meetings.

Dominique Berube

543 Queen,
Greenfield Park Quebec,
CANADA J4V 1R4

Larry G. Bezark

521 46th. St.
Sacramento, CA 95819

Taxonomy of robber flies, N.A. beetles, willing to exchange Diptera, coleoptera, and hymenoptera.

Joe Bisconti

132-35 87th St.
Ozone Park, NY 11417

**** MEMBER NAMES, ADDRESSES, AND INTEREST STATEMENT ****

Chris Blair

23 Surrey Lane
Decatur, IL 62526

Started as a 4-H collector.

Lance Blakemore

RD 1, Box 141
Buskirk, NY 12028 USA

Dr. G. F. Bornemissza

78 Nelson Road
Hobart, TAS 7005
AUSTRALIA

Coleptera: Sexual Dimorphism, Polychromism and Polymorphism. Ecology:
Role of Lamellicornians in recycling nutrients in ecosystems. Ecology
of dung beetles (Scarabinae).

Michael L. Bourandas

1150 Ohio Avenue, #6
Long Beach, CA 90804

Diptera: General systematics & special interest in Dolichopodidae.
Techniques: Insect histology/anatomy. Other arthropods: general
collecting and systemics.

Howard P. Boyd

232 Oak Shade Road
Tabernacle Township
Vincentown, NJ 08088

Susan May Bradford

15812 W. Oak Street
Delhi, CA 95315

Tristao Branco

Rua de Camoes, 788, 2 Dto
P - 4000 Porto, PORTUGAL

Scarabaeoidea. Systematics and faunistics.

Lynn Braun

Route 39, Box 128
St. Mary's, WV 26170

Learn to collect.

**** MEMBER NAMES, ADDRESSES, AND INTEREST STATEMENT ****

Artiidae, Syntomidae, Limacodidae, Sphingidae, Saturnidae. Breeding and rearing. High-altitude entomology. Regional variation. Correspond/exchanges with members anywhere in U.S.A., Central and/or S. America

Ann M. Patten

77 Robert Treat Drive
Milford, CT 06460

David C. Patten

General Delivery
Peace-Valley, MO 65788

Rearing butterflies, would like to learn about South American butterflies

Luis R. Perez

HC 02, Box 18881
San Sebastian, Puerto Rico 00755

Collecting, click beetles, dictyoptera.

**** MEMBER NAMES, ADDRESSES, AND INTEREST STATEMENT ****

William Perreira

1544 Kewalo St.
Honolulu, Hawaii 96822

Joe Persons

12902 130th Avenue
Rodney, Michigan 49342

Glen Pierce

1318 Kirk S.E.
Grand Rapids, MI 49506

Randy Plona

7458 Sunrise Oval
Middleburg Heights, Ohio 44130

I am most interested in the life history of Saturniidae. I have been keeping records for 2 years now. I hope to become a professional breeder one day.

Benjamin Price

318 E. Jefferson
Grand Ledge, MI 48837

Ronald J. Priest

1011 N. Fairfield
Mt. Pleasant, MI 48858

Life histories & hosts of Great Lakes area microlepidoptera

Logan Priolla

1922 Wiltsey Road, SE
Salem, Oregon 97306

Butterflies: aerial net, killing jar.

Lepidoptera: like to learn what Lepidoptera when they are caterpillars.

Patricia A. Purdy

303 Elm St.
Salem, VA 24153

Casual collecting, species identification, life history studies of most familiar local insects & spiders.

**** MEMBER NAMES, ADDRESSES, AND INTEREST STATEMENT ****

Ruth R. Ralston

Box M-2, Main P.O.
Hoboken, NJ 07030-0002

Interested in all types of insects and their relatives; especially interested in katydids, tree crickets and all singing insects.

Judy Ratkos

1703 Greencrest Ave.
East Lansing, MI 48823
